

## Lab-Specific Safety Training Record

The University requires documentation that all laboratory personnel have received Lab-Specific Safety Training. This training is provided by the Principal Investigator (PI) or their designee.

Principal Investigator:

Date:

Department:

This checklist will assist the PI or Lab Supervisor in providing training as described in the OSHA Laboratory Safety Standard and the University's Research Safety Program. It is the Principal Investigator's responsibility to ensure all research laboratory personnel (employees, students, visiting researchers) are trained. This training must be provided initially, annually, and anytime there is a major procedural change. This record should be used as a guide to the contents you should cover in the training. You must address all hazards that are applicable to your research, including: chemical, biological, and radiation safety. Please keep this record for 5 years as documentation of the training.

In addition, the Department of Environmental Health and Safety (DEHS) requires employees to take general safety refresher training annually. Please contact your Departmental Safety Officer for information regarding this training. Additional task-specific training topics should be covered based on the hazards in your lab as appropriate. Training resources are provided on the [DEHS web site](#).
